

EMS Base Hospital Operations Simbulance Training Program

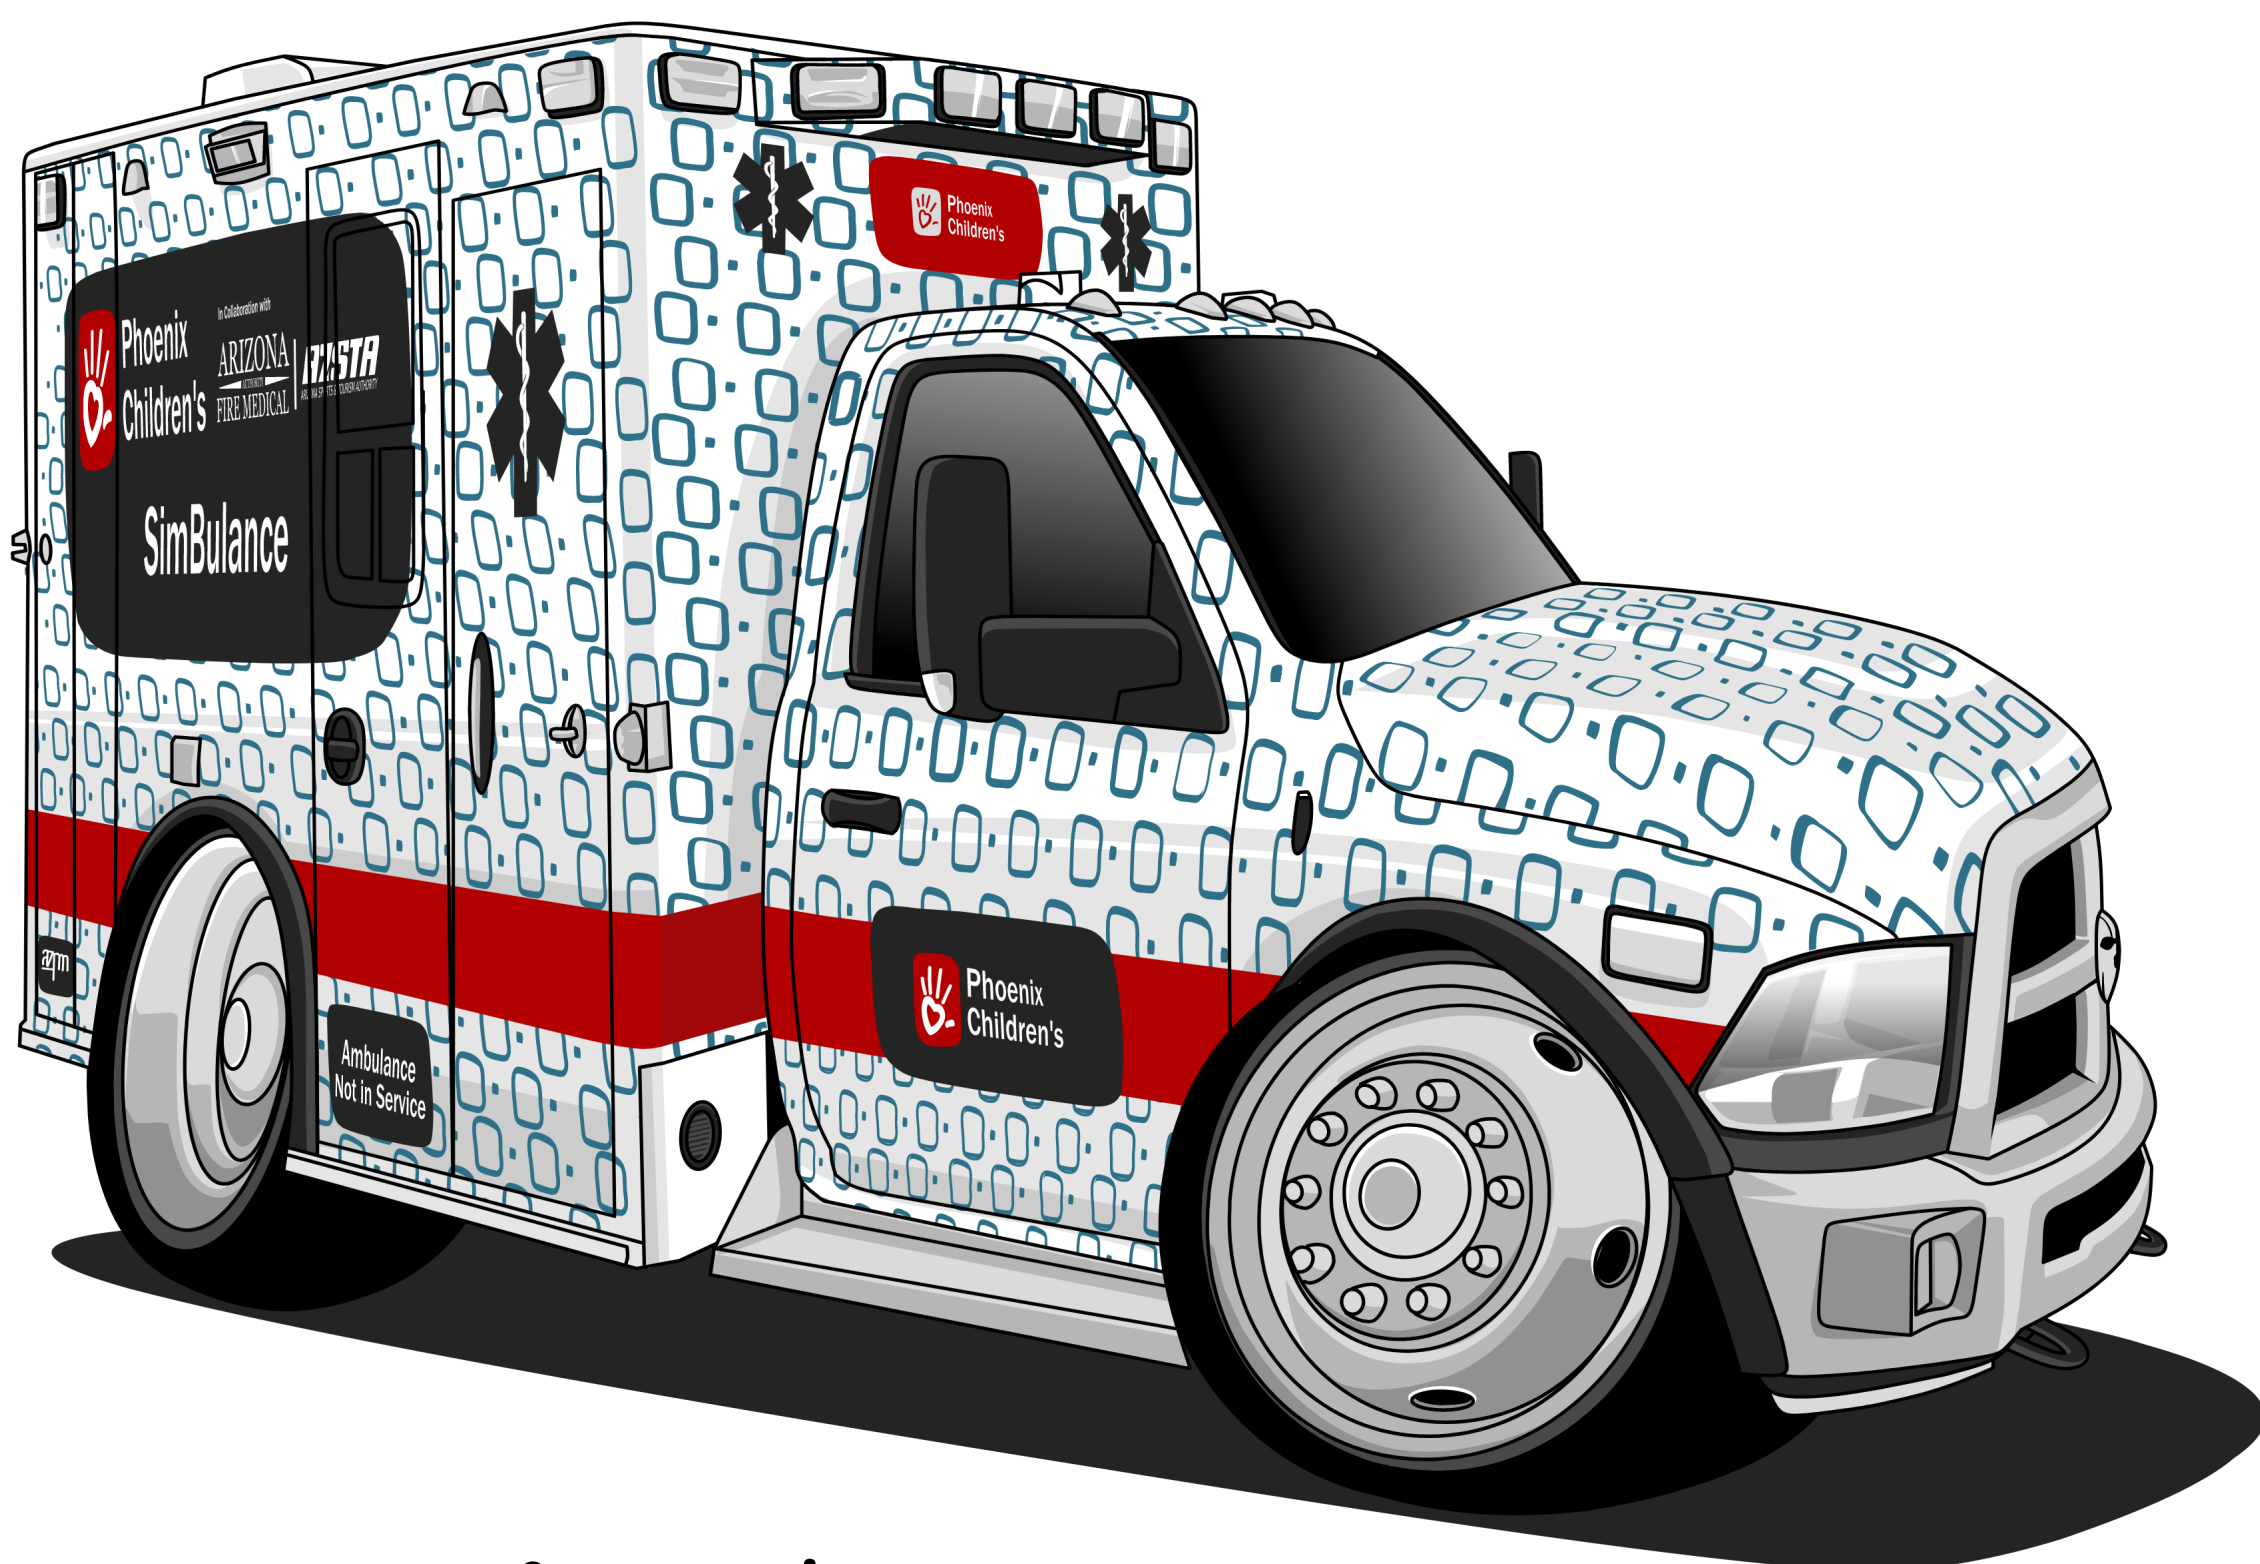

Phoenix Children's Simbulance program was created to help educate, improve patient outcomes, and raise the standard of care, benefiting all neonates, infants, and children facing emergency situations. The Program will provide training to first responders, firefighters, and EMTs responsible for medical oversight, stabilization and prehospital patient care to neonates, infants, and children. The Simbulance program is a grant funded educational program and facilitated by our EMS and Base Hospital Program. Our Simbulance and Base Hospital team will travel to the requested location to provide comprehensive simulated prehospital training to EMS agencies throughout Arizona.
